

## **Bison 4 Weekly Construction Report**

**Case No. PU-13-127**

**Week Ending 04/27/14**

Michels are working in the cable “trenway” at Bison Substation, working on underground conduit, setting steel and installing the ground grid.

Wanzek is performing earthwork activities in Area 3 (415-420) and Area 5 (433-437), and they are finishing up the directional boring pipes for collector lines. Due to the frost coming out of the roads there is county road repair/maintenance work being performed.

Note: On 4/22/14 there was a fire caused by a track making contact with a rock on a dozer that burned approximately 150 acres of pasture and wheat stubble. There were no injuries, or damages to any structures. Some restoration work is needed to grade the firebreak put in place, and some fencing to be repaired.

### **Work Force**

Minnesota Power – 5

Wanzek – 68

Michels - 6
